(54) Transfer of electronic money

(57) The object of the invention is a wallet (9), which comprises a card reader (10) for receiving an electronic money card (11) being detachably coupled thereto. In addition, it comprises an LPRF transceiver (14), which is integrated into the wallet (9) and in connection with (13) the reader (10) for establishing a short-range radio

frequency connection (12) to outside the wallet to a device (8), which is in connection with a telecommunication network. Through this connection, electronic money can be transferred between the money card (11) and a third party (17), which third party (17) can be an Internet network server. Another object of the invention is a system and a method for transferring electronic money.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 10 5623

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
